Abstract This paper presents the results of a study of the effects of the 1997-1998 Asian financial crisis on the demand for health insurance in Taiwan. The results show that the demand for health insurance is significantly affected by the crisis, with a significant increase in the demand for health insurance in the private sector and a significant decrease in the demand for health insurance in the public sector. The results also show that the demand for health insurance is significantly affected by the crisis, with a significant increase in the demand for health insurance in the private sector and a significant decrease in the demand for health insurance in the public sector.
